Harin Lee

Seoul, Republic of Korea | harinlee0503@gmail.com | daisy-blossom-v.github.io

RESEARCH INTERESTS

Human–AI Interaction; Human-Centered AI; AI-Assisted Decision-Making; AI in Economic and Business Contexts; AI Evaluation and Accountability

EDUCATION

Ewha Womans University Mar. 2016 – Aug. 2020
B.A. in Economics and Chinese Language & Literature (Double Major) *Seoul, Republic of Korea*

Fudan University Sep. 2017 – Jan. 2018
Exchange Student *Shanghai, China*

PUBLICATIONS

Harin Lee and Donghyun Sohn. 2026. "Who Told the Agent What to Do? AI Instruction Files and Accountability Before Code Review." *"Nobody Did This": Contribution, Originality, and Accountability in Agent-Mediated Collaboration*, workshop at CSCW 2026. [Paper] [Code]

RESEARCH EXPERIENCE

Accountability in Human–AI Collaboration Apr. 2026 – Jul. 2026

- Analyzed 4,664 AI instruction files from 4,485 GitHub repositories; compared 499 instruction–README pairs using LLM-assisted analysis, with 150 CONTRIBUTING–README pairs as a human-facing documentation baseline.
- Manually validated 323 classifier-flagged items across 60 document pairs; confirmed that 57% of this validation set contained both behavioral constraints and project judgments absent from the corresponding README.
- Proposed the *Instruction Context Capsule*, a design concept for surfacing relevant, versioned AI instructions to support contributor endorsement and reviewer scrutiny.
- Discussed implications for contribution attribution and employee performance evaluation, emphasizing selective visibility of instruction context rather than workplace surveillance.

Wine Informatics and Supply Chain Traceability Sep. 2026 – Present
Research Assistant to Prof. Paul Moon Sub Choi, Ewha Womans University

- Examined the evidence and assumptions behind a wine-tokenization platform's economic claims, clarifying the comparisons and costs needed for evaluation and the roles of sensor data and human verification.
- Research assistance acknowledged in Lee, J., Choi, P.M.S., 2026. OrganicSmart, Inc.: The convergence of wine supply chain and distributed ledger technology. In: *Enological Advances* (in progress). Springer, Berlin.

PROFESSIONAL EXPERIENCE

Shinsegae I&C Feb. 2022 – Present
HR Specialist, Human Resources Team *Seoul, Republic of Korea*

- **AI Literacy Assessment System:** Designed a company-wide assessment of employees' ability to use AI effectively and responsibly (2026 rollout; annual for all employees), leading system design with in-house developers from data tables to scoring and results views. Ten 5-point items cover when to use AI, data confidentiality, and reviewing AI-generated code; scores map to A–D grades that managers confirm before use in tailored training and project staffing.
- **AI-Supported Onboarding:** Co-designed and deployed a new-hire onboarding curriculum combining structured AI tutoring with cohort-based learning (2026 rollout); leading post-deployment evaluation using survey and usage data.
- **Employee-Facing System Design:** Led end-to-end design of the company's web and mobile HR platform for approximately 1,400 employees (service structure, information architecture, user flows), with engineers handling implementation; unified attendance, payroll, compensation, and training in one view and turned survey-identified usability problems into fixes.
- **Workforce Analytics:** Managed company-wide SAP HR data and analyzed workforce cost structure to inform restructuring.
- **Industry Interview:** Featured in an *HR Insight* interview on employee-centered HR system design (Jun. 2026). [Article]

Mercer Jun. 2020 – Oct. 2020
Research Assistant, Total Rewards Solutions *Seoul, Republic of Korea*

- Conducted compensation benchmarking and statistical analysis across approximately 300 domestic and international firms; synthesized cross-national HR policy research into client compensation reports.

RESEARCH METHODS & TECHNICAL SKILLS

Research Methods	Document analysis; validation of LLM-assisted coding; survey design and analysis; user interviews
Quantitative Analysis	Regression analysis; hypothesis testing; compensation benchmarking
Programming & Data	Python; SQL; SAP HR data management
Systems Design	Requirements analysis; information architecture; user-flow design
Training (2022)	SQL Expert Course, Shinsegae I&C; Labor Management Program, JoongAng Economy HR Institute
