

# Harin Lee

Seoul, Republic of Korea — harinlee0503@gmail.com — <https://daisy-blossom-v.github.io/>

## RESEARCH INTERESTS

---

Human-Computer Interaction, User Experience Research, Human-AI Collaboration and Teaming, Human-Centered AI, Sociotechnical Systems in the Workplace, Enterprise Information Systems, AI Adoption in Work Systems, People Analytics

## EDUCATION

---

### Ewha Womans University

*B.A. in Economics and Chinese Language & Literature (Double Major); GPA 3.65 / 4.50*

*Seoul, Republic of Korea*

Mar. 2016 – Aug. 2020

### Fudan University

*Exchange Student, School of Economics*

*Shanghai, China*

Sep. 2017 – Jan. 2018

## INDEPENDENT RESEARCH

---

**Documentation by Demonstration: An Empirical Study of AI Agent Instruction Files in Public Software Repositories**  
*Manuscript in preparation, 2026*

- Across 4,664 AI agent instruction files from 4,485 public repositories, 49.5% of content consists of code examples rather than declarative rules, consistent across tools (CLAUDE.md, Cursor, Copilot) and team types.
- Paired comparison of 4,094 AI-instruction and README documents shows AI-facing files use imperatives at 6× the rate of README (paired Wilcoxon,  $r = 0.83$ ).
- Longitudinal tracking of 599 repositories shows README files grew on average 37% in the year following AI instruction file adoption, indicating an additive rather than substitutive documentation layer.

## PROFESSIONAL EXPERIENCE

---

### Shinsegae I&C

*HR Specialist, Human Resources Team*

*Seoul, Republic of Korea*

Feb. 2022 – Present

- **Employee-Facing HR System Design:** Led user experience analysis with ~1,400 employees across heterogeneous roles to inform the design of the company's mobile HR platform; collaborated with HR-system engineering team on feature prioritization, information architecture, and user-flow decisions for core modules (attendance requests, leave balance tracking, benefits enrollment); translated workforce diversity into concrete interface and access-pattern requirements.
- **AI-Integrated Workforce Programs:** Co-designed and deployed an AI-augmented onboarding curriculum for new-hire cohorts (2026 rollout), pairing structured AI tutoring with cohort-based learning across employees with heterogeneous prior expertise; leading post-deployment evaluation through paired survey and usage data.
- **Workforce Analytics & Compensation:** Administered end-to-end payroll cycles (~1,400 employees) in SAP and conducted quantitative analysis of workforce cost structure; evidence-based restructuring drove a 10% reduction in benefits expenditure and contributed to a 20% reduction in total personnel expenses against organizational targets.
- **Organizational Diagnostics & Intervention Design:** Designed selective working-hours and compensatory leave programs (100% adoption excl. field/sales) and a paired long-hours reduction campaign; annual organizational health surveys showed ~20% reduction in overtime pay and a 13% decrease in overtime hours (2024).

### Mercer

*Research Assistant, Total Rewards Solutions*

*Seoul, Republic of Korea*

Jun. 2020 – Oct. 2020

- Conducted compensation benchmarking and statistical analysis across ~300 domestic and international firms to derive industry-level wage estimates; synthesized multinational HR policy research into client-ready Compensation Reports.

## TECHNICAL SKILLS

---

**Programming / Data** Python, SQL

**Statistical Methods** Regression analysis, hypothesis testing, survey analysis

**UX Research Methods** User interviews, requirements analysis, cross-functional collaboration with engineering teams

## CERTIFICATIONS, TRAINING & AWARDS

---

**2025** Three Presidential Commendations (organizational): Work-Life Balance, Top Employment Enterprise, and Family-Friendly Excellent Enterprise Awards

**2022** SQL Expert Course, Shinsegae I&C; Labor Management Program, JoongAng Economy HR Institute
